Ayush Rao

Software Engineer – AI/ML & Data Engineering

+91-7667880422 | ayushrao786420@gmail.com | Noida / Delhi NCR, India | linkedin.com/in/ayush-ar-rao | github.com/Ayush2412Rao

PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on experience across Power Platform reporting (Power BI, Copilot Studio, Power Automate), SQL Server, and agentic AI frameworks (LangChain, LangGraph). Skilled in building low-code automation solutions, enterprise reporting systems, and full-stack applications (React, FastAPI, Django). Continuously expanding expertise through focused training in multi-agent orchestration and Snowflake cloud data warehousing.

EXPERIENCE

MAQ Software | *Software Engineer 1 – AI/ML, Data Engineering* *May 2025 – Present | Noida, India*

- Engineered 3 Power BI reports within the FTBA project's reporting pod, architecting customer-data visualizations and validating visual-layer outputs against SQL Server for accuracy.
- Architected REF Agent, a low-code conversational solution built on Copilot Studio and Power Automate, orchestrating automated workflows triggered by real-time user interactions on Microsoft Teams.
- Completed advanced training in multi-agent system design using LangChain and LangGraph, engineering a proof-of-concept for multi-level agent orchestration.
- Spearheaded development of a reporting agent for the Executive Sponsorship Survey initiative, integrating Copilot Studio, Power Automate, and Power BI to deliver insights sourced from an enterprise semantic model.
- Pursuing specialized Snowflake training, culminating in a capstone project demonstrating applied proficiency in cloud data warehousing and engineering.

Grasim Industries Limited (Aditya Birla Group) | *IT Intern* *June 2024 – July 2024 | Renukoot, India*

- Assisted senior IT engineers in monitoring SAP FM and SAP MM modules, ensuring smooth system operation and data integrity.
- Supported rollout and training of SAP ERP to employees, facilitating seamless ERP integration across the organisation.

PROJECTS

Executive Sponsorship Survey – Reporting Agent | *Copilot Studio, Power Automate, Power BI* *April - June 2026*

- Built and deployed a reporting agent for the Executive Sponsorship Survey initiative using Microsoft Copilot Studio and Power Automate, automating workflows and reducing manual effort.
- Integrated data from an enterprise semantic model with Power BI, enabling reliable, data-driven survey reporting and improving consistency across reporting outputs.
- Optimized the reporting workflow by automating repetitive data and reporting tasks, enabling stakeholders to access survey insights more efficiently.

UrbanMart – Omnichannel Retail Intelligence Platform | *Snowflake, SQL, SnowSQL, Cortex AI* *August 2026*

- Built an end-to-end omnichannel retail analytics platform in Snowflake, integrating orders, products, inventory snapshots, and semi-structured customer clickstream data across store, web, and mobile channels.
- Designed a layered data architecture with dedicated ingestion, transformation, and analytics zones, implementing data loading, validation, JSON parsing, and enriched analytical datasets for cross-channel reporting.
- Implemented Snowflake capabilities including Time Travel, zero-copy cloning, secure data sharing, RBAC, dynamic data masking, network policies, and performance optimization to improve data governance, recovery, and platform efficiency.
- Developed analytics and executive reporting solutions covering sales performance, inventory health, delivery metrics, customer behavior, and AI-powered insights using Snowflake Cortex, supporting faster and more data-driven business decisions.

EDUCATION

Lovely Professional University — Bachelor of Technology – Computer Science and Engineering | CGPA: 7.69 *2022 – 2026 | Jalandhar, Punjab*

TECHNICAL SKILLS

Languages: Python, SQL, C, C++, Java, R, JavaScript, TypeScript
AI/ML & Data Science: Machine Learning, Deep Learning, Predictive Analytics, PyTorch, spaCy, Pandas, NumPy, CNNs
Generative & Agentic AI: LLMs, RAG, LangChain, LangGraph, Semantic Kernel, Microsoft Agent Framework, MCP, Vector Search, Prompt Engineering
Frameworks & Web: FastAPI, Django, React, Next.js, Angular, REST APIs, Tailwind CSS
Cloud & Platforms: Microsoft Azure, Azure AI, Microsoft Fabric, Power Platform (Power Apps, Power Automate, Copilot Studio), Docker, Git/GitHub
Databases & Analytics: PostgreSQL, pgvector, Supabase, SQL Server, MySQL, Snowflake, Apache Hadoop, Hive, Power BI, Tableau

CERTIFICATIONS

Cloud Computing – IIT Kharagpur | Full Stack Web Development Using MERN – Cipher Schools | AI Agent Builder Associate – Microsoft | Introduction to Hardware and Operating Systems – Coursera
